# KRISHNA SIDHVI NEKKANTI

Hyderabad, India ♦ +91 8341145666 ♦ Portfolio ♦ Gmail ♦ LinkedIn

## SUMMARY:

Highly skilled Data Analyst and Engineer with a proven ability to design, build, and optimize scalable data pipelines and ETL solutions. Known for improving processing reliability by up to 30% and reducing data anomalies by 50%, with a strong focus on translating business needs into innovative, data-driven solutions. Passionate about fostering operational efficiency, ensuring data integrity, and enabling data-centric decision-making. Proficient in leveraging cloud platforms such as AWS (Glue, Redshift, Lambda), Informatica, and Azure Data Factory to enhance data quality, reliability, and performance. Demonstrated expertise in Python, SQL, and data visualization tools like Tableau and Power BI to deliver actionable insights and drive business decisions.

## CORE COMPETENCIES: *Data Analysis & Management | Data Science, Governance, & Reporting | Data Quality and Integrity | Data Warehouse, Integrations, Replication, Translation | ETL Processes | Data Structures & Database Management | Consultative & Solution Selling, Risk Mitigation | Key Performance Metrics Tracking & Report Preparation | Milestone & Progress Tracking | Data-Driven Decision-Making & Reporting | Cross-functional Collaboration & Teamworking | Competitive Intelligence | High Impact Presentation Delivery.*

## TECHNICAL SKILLS:

- ***Programming Languages:*** *Python, SQL*
- ***Cloud and Data Engineering Platforms:*** *AWS (Glue, Redshift, Lambda), Azure Data Factory, Informatica*
- ***Big Data and ETL Technologies:*** *Apache Spark, Hadoop, ETL*
- ***Data Analytics and Visualization Tools:*** *Power BI, Tableau, Power Apps, Power Automate*
- ***Data Integration and APIs:*** *REST APIs, AWS Data Pipeline, Azure Fabric*
- ***Version Control and Collaboration:*** *GitHub, Jira, VS Code*
- ***Data Science Frameworks and Libraries:*** *Scikit-Learn, Pandas, NumPy, Matplotlib, TensorFlow, PyTorch* •
  ***Streaming and Messaging Technologies:*** *Apache Kafka*

## WORK EXPERIENCE

**DATA ANALYTICS ENGINEER**

**Global Payments, Atlanta,GA – Contract** **March 2024 – January 2026**

- Analyzing transaction patterns across payment channels to optimize payment processing efficiency, leveraging Python and SQL for deep insights.
- Developing and maintaining Tableau dashboards for real-time tracking of key payment metrics, enabling data-driven decisions across operations and risk management teams.
- Supporting fraud detection initiatives by analyzing historical data to identify anomalies, improving model accuracy and reducing false positives by 15%.
- Refining ETL pipelines in collaboration with data engineers using AWS Redshift and Informatica, ensuring seamless data integration and consistent workflows.
- Conducting rigorous data quality checks and implementing validation frameworks, reducing data anomalies by 40% and ensuring compliance with regulatory standards.

**DATA ENGINEER**

**Amazon, Seattle, WA - Contract** **September 2023 – January 2024**

- Spearheaded enhancements to data pipelines using AWS Glue and Informatica, achieving a 30% improvement in processing reliability and scalability.
- Automated ETL workflows with AWS Data Pipeline, reducing manual effort and increasing efficiency by 25%, ensuring timely and accurate data delivery.
- Conducted robust data quality checks with Python and AWS Redshift, reducing data anomalies by 50% and ensuring high-quality datasets for analytics.
- Integrated REST APIs with AWS services to enable seamless data extraction and accessibility, supporting critical business analytics and reporting needs.

- Optimized SQL-based data mapping using Athena, ensuring precise and timely month-end reporting for data-driven decision-making.

**DATA ANALYST**

**Vanguard, Malvern, PA - Contract** **July 2022 – December 2022**

- Optimized Tableau dashboards connected to SQL Server and PostgreSQL, driving real-time monitoring of KPIs and improving operational efficiency by 15%.
- Enhanced reporting capabilities and enabled data-driven decision-making by developing supplemental Power BI solutions to augment Tableau insights.
- Managed Azure Data Factory pipelines, ensuring seamless and accurate data flows for real-time dashboard updates and analysis.
- Coordinated Azure Fabric and REST API integration, enabling seamless cross-platform data flow and supporting dynamic reporting needs.

**MASTER'S DEGREE RESEARCH – DATA SCIENCE PROJECTS**

**University of Maryland Baltimore County** **August 2021 – May 2023**

**Real-time Number Plate Detection System**

- Designed and implemented a real-time vehicle registration number detection system to enhance traffic management.
- Achieved 95% accuracy in number extraction using YOLO-based CNN and Python, improving traffic monitoring efficiency.
- Reduced manual intervention, streamlining traffic law enforcement workflows.
- Utilized tools and technologies including YOLO-based CNN, OpenCV, TensorFlow, Google Colab, and NumPy.

**Chicago Crime Analytics**

- Developed a machine learning model to predict crime patterns in Chicago, enabling data-driven allocation of law enforcement resources.
- Reduced crime rates by 12% in targeted areas through actionable insights provided via Tableau dashboards.
- Conducted extensive data preprocessing and analysis using Python, Pandas, and NumPy, and implemented machine learning models with scikit-learn.
- Delivered a comprehensive visualization tool for operational decision-making.

**Fraud Prediction on Credit Card Transactions**

- Built and deployed a fraud detection system to identify fraudulent transactions with high accuracy and reduced false positives.
- Enhanced fraud detection accuracy by 25%, leading to significant cost savings and increased customer trust.
- Implemented real-time fraud prevention measures using AWS Lambda and Kafka for seamless deployment and data streaming.
- Leveraged Python, MongoDB, Matplotlib, and Seaborn for analysis and visualization.

## EDUCATION

- **University of Maryland Baltimore County – Baltimore, MD | May 2023** Master of Professional Studies in Data Science
- **Amity University of Rajasthan – Jaipur, India | May 2021**
  Bachelor of Science in Technology
    - Minor degree in business management
    - Additional minor degree in german(Foreign language)

## CERTIFICATIONS

- **Associate Data Engineer by AWS**
- **Introduction to Career Skills in Data Analytics by linkedin**
- **Academy Accreditation – Generative AI Fundamentals by Databrics**
- **Build LLM Evaluation Applications with LangChain by Linkedin**
- **Execute and Evaluate Hugging Face AI Models by Linkedin**
